DETAILED ACTION

Declaration

1. An executed Declaration was received on 14 June 2004.

Specification

2. The disclosure is objected to because of the following informalities: In paragraph [0053], correct the word "de(magnification)".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 – 3, 18, 19, 38, 46 and 53 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese reference 6-124873.

The reference discloses a lithographic apparatus comprising a support structure 12, 14 for supporting a patterning device 3; a projection system 4 has a joint between the lens element 7 and the support. The joint has an organic layer 8. A liquid supply system (not shown) supplies liquid to a reservoir 9 in the apparatus in a space between the projection system and the substrate 2 resting on the table 12.

Allowable Subject Matter

5. Claims 4 – 17, 39 – 41 and 47 - 52 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Claims 20 – 37 and 42 – 45 are allowed.
7. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not suggest the composition of the sealing inorganic layer or how the layer is formed.
